

The “**Chemistry**” master studies at Chemistry Department of Adam Mickiewicz University in Poznań, Poland, which start in October 2017 (<http://chemistry.home.amu.edu.pl/>). We intend to reach students **in Chemistry or any other related sciences**. The teaching is going to be delivered in **English**.

This **two-year master studies** aim at training students in areas of great relevance such as: **organic chemistry, analytical chemistry, physical chemistry, nanosciences, nanomedicine, innovative materials, medical and pharmaceutical chemistry**. The courses, apart from highly regarded Polish scientists, are going to be conducted also by the worldwide scientists from Japan, Spain, Italy and UK.

We offer a lot of benefits for the students: a **scholarship** for each foreigner student (of **about 400 € per month, 20 scholarships** are available), a **summer school**, and a large range of facilities offered to the students.

**Application online** (<http://chemistry.home.amu.edu.pl/index.php/registration/how-to-apply>) is still under construction but it will be available as soon as possible. Enrollment in June 2017.

We thank you in advance for passing on this information to any student who might be interested.
